SOLUTIONS

Corax for Exposure Management

Corax enables you to introduce and model new risks into your portfolio from an aggregation perspective, also helping you to identify points of aggregation within your portfolio by industry, vendor, geography, or sub-limits in order to quantify, for example, the effect of an 1-10 event.

Using Corax's powerful Exposure Management features, you can also quickly run custom RDS scenarios as well as pre loaded scenarios such as the prescribed Lloyds scenario.

Stress test your book

Run RDS scenarios to easily see your points of aggregation/silent
