

Decision Support for Cyber Risk and Insurance Professionals

Features

Why CyberFactors?

CyberFactors represents unparalleled analytics for understanding the financial risk of using technology.

Our **decision support** analytics include business risk, liability and loss that are related to, created by, or exacerbated by the presence of information technology and/or the Internet. **Events include significant risks like social media, hacktivism and cloud computing.**

- Events are **tracked from start to finish**
- Refreshed **daily**
- Events across **all industries**
- Includes both **US and International events**
- Relevant data going back to **2005**
- Follow **financial losses** and **judgments**
- Includes **insurance payout**
