RiskLens Partner With Evolver To Provide Quantified Risk Analysis

by *James Finn* on Jun 27, 2016 5:30:00 PM

[Tweet](#)[Share](#)[Like 0](#)[Share](#)

Evolver, Inc., a technology provider for Federal, Commercial and Legal clients announced today a partnership with **RiskLens**, the premier provider of cyber risk quantification software, which will play a major role in Evolver's revolutionary Cyber Risk Ecosystem.

This unique cybersecurity approach helps their clients plan, monitor and execute cyber programs on a quantified financial basis.

For executives seeking to manage their cybersecurity programs based on dollars and cents, instead of qualitative terms such as "high, medium, low" or "increased threat" reports, Evolver quantifies an organization's cyber risk to identify the risk reduction opportunities throughout the entire cybersecurity process.
