Managing Cyber Risk from Wiring Closet to Boardroom

[LEARN MORE](#)

Take back control of cyber risk and square your cyber expenditures with sound business practices to:

- Contain runaway cybersecurity spending
- Re-establish public, client and shareholder confidence
- Mitigate regulatory and legal overreach

L3's CyberQ – Executive Risk Analysis deterministically measures earnings, capital and the reputation exposure of high-impact cyber risks in your specific infrastructure. You can now manage cyber expenditures commensurate with exposure.

OUR VISION

At CyberQ, we are passionate about empowering our clients to make better-informed decisions in the area of cyber risk management. The following principles drive us to deliver coherent, repeatable, and traceable measurements you can trust at every level of your organization:

1. Managing cyber risk requires treating it as an economic problem, not just a technical problem
2. Quantifying cyber risk for your network using mathematical rigor is vital to generate trustworthy data
3. A cyber risk posture consistent with your risk appetite requires financial quantification
4. Unless you can measure your cyber risk baseline, you cannot effectively manage it!

SOLUTION

ENTERPRISE-LEVEL SOLUTIONS FOR TECHNICAL RISK

Risk Executives must shift to consequence-driven cyber risk management -- not technology-driven. This shift enables you to:

- Ensure consistency between cyber risk posture and cyber risk appetite
- Manage cybersecurity ROI - commensurate with exposure
- Preserve capital pursuant to stress test requirements
- Establish confidence and trust for stakeholders, allies and the public
- Prepare for emerging regulations (e.g., Enhanced cyber risk Management ANPR & NYCRR 500)

Measuring consequence and managing exposure allow risk executives to take control of cyber risk pursuant to business interests.

OFFERINGS

ADVERSARY/THREAT ANALYSIS

CyberQ leverages the latest adversary intelligence to evaluate the resilience of your enterprise under sophisticated attacks from a variety of hostile actors, including

Cyber Risk North America

June 20th and 21st, 2017 - New York Marriott Marquis Times Square, New York, NY

L3 CyberQ is a sponsor and speaker

- Quantifying Cyber Security Risk – It's Time! (<http://www2.l-3com.com/cyberq/pdfs/Quantifying%20Cyber%20Security%20Risk%20-%20It's%20Time.pdf>) - Joe Portale

Op Risk North America

June 20th and 21st, 2017 - New York Marriott Marquis Times Square, New York, NY

L3 is a sponsor and speaker

- Quantifying Cyber Security Risk – It's Time! (<http://www2.l-3com.com/cyberq/pdfs/Quantifying%20Cyber%20Security%20Risk%20-%20It's%20Time.pdf>) - Joe Portale

BENEFITS OF THE CYBERQ EXECUTIVE RISK ANALYSIS

1. Uses a Network Behavior Model (NBM) based on factual evidence and advanced analytics techniques to mathematically quantify cyber risk elements in your specific institution
2. Modeling approach supports exhaustive modeling of a wide range of adversaries using a virtually unlimited range of approaches and methods
3. Process ensures an accurate and repeatable valuation of cyber risk that measures financial impacts of cyber attacks on the confidentiality, integrity and availability of your institutional information assets
4. Measures cyber risk exposure against enterprise financial goals, which provides you exposure of cyber risk in business terms which streamlines policy making, cybersecurity budgeting, risk committee reporting and duty of care for investors
