and Planning Software

An all-in-one solution for business continuity planning and management.

DOWNLOAD THE DATASHEET

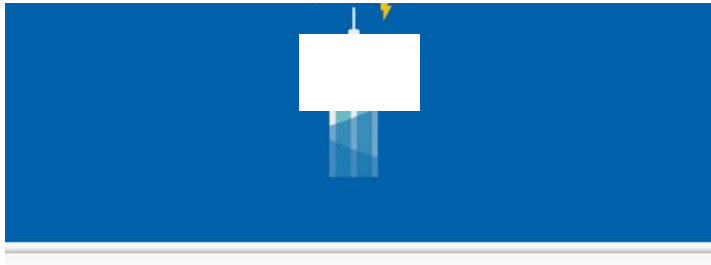

Business Continuity Management (BCM) and Disaster Recovery Software

Operationally strategic and deployable business continuity and disaster recovery plans are critical to ensuring your organization can survive and succeed following an unplanned disaster. Many organizations simply maintain large paper notebooks of business continuity and disaster recovery plans that sit on a shelf and quickly become outdated.

Maintaining these BC/DR plans with word processing software or ad hoc solutions is time consuming and doesn't meet the growing requirements from regulators, auditors, government agencies, customers, and investors.

Quantivate Business Continuity Software reduces the time you spend managing and maintaining plans. The solution enables you to understand your organization, develop implementable business continuity and disaster recovery plans, keep your plans up to date, and increase the availability of critical operations across the enterprise. The Quantivate Business Continuity Software solution uses a repeatable methodology that removes single points of failure in processes and technology. This

Quantivate Business Continuity Software helps you:

STAY INFORMED

Understand connections and dependencies across your organization through integrated data-sharing capabilities

PROTECT YOUR ORGANIZATION

Use guided processes to develop a complete continuity program – rather than disconnected activities and data silos – based on your actual business processes and resources

Access BC/DR plan templates, a built-in editor tool, and even optional consulting services to get your continuity program headed in the right direction

Flexible and Scalable BCM Software

Quantivate Business Continuity Software has an easy-to-use interface that allows you to quickly construct your BC, DR, pandemic, and crisis management plans with minimal effort. Simply point, click, and configure your way to a business continuity management solution that fits your needs.

Increase ROI With Integrated Business Continuity Planning Software

Why purchase multiple modules for your BC/DR process? A business continuity and disaster recovery software solution should include all the tools you need for BC/DR planning. **Quantivate Business Continuity Software** increases your ROI with one holistic platform for all your business continuity planning and management needs. The Quantivate Business Continuity / Disaster Recovery system keeps your data flowing throughout the BCP process — no need to manually re-enter your data into separately purchased modules. Quantivate Business Continuity includes:

Risk Assessment (Threat and Vulnerability Analysis)

Business Impact Analysis (BIA)

Strategies and Solutions Development

Plan Development

Emergency Notification (SMS, Email, Voice Broadcast)

Incident Management

Easy Plan Customization and Pre-Built Templates

Quantivate Business Continuity and Disaster Recovery includes question-based plan templates that will increase your efficiency, engage your employees, and prompt them to think. With an easy-to-use word processor interface, the software ensures that your plans can be built in a matter of hours, not days. Plus, you can save even more time with customizable, pre-built templates that allow you to focus on important BC/DR plan details rather than redundant tasks. Available BC/DR plan templates include:

Business Continuity

Continuity of Operations

Pandemic Flu

Application Disaster Recovery

Platform Recovery

Server Recovery

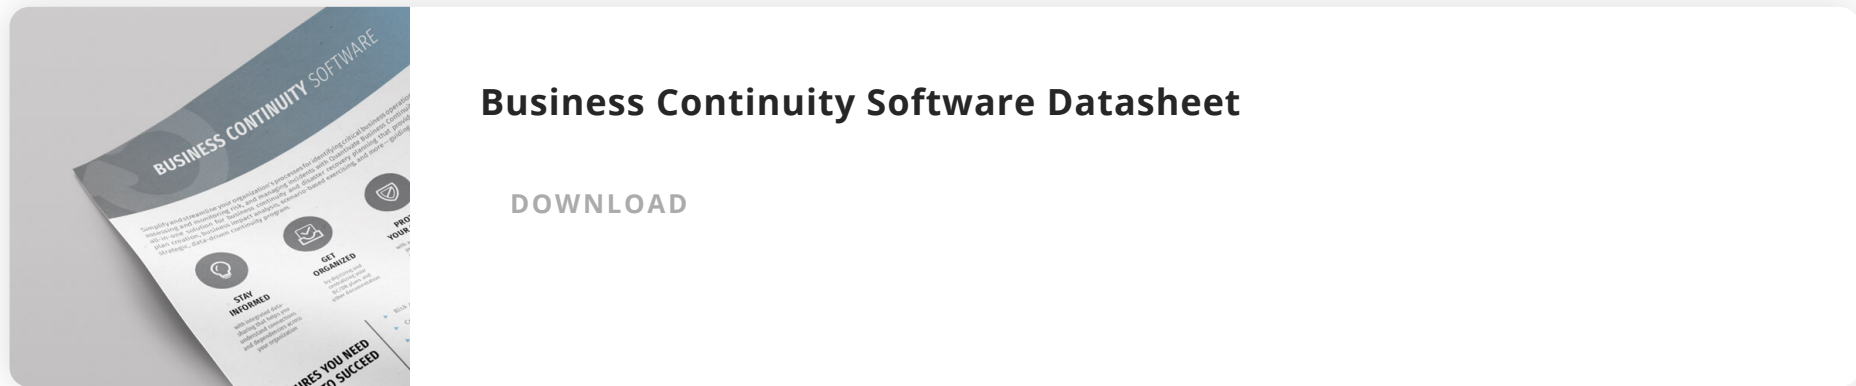

Data Center Recovery

Crisis Management (with or without Incident Command System elements)

business continuity managers and staff to easily access, store, and synchronize all your business continuity plans on mobile devices.

The Quantivate Mobile App allows you and your team to:

Synchronize the most current BC plans to iOS and Android devices.

Access the most accurate contact details for key personnel.

Save time and money by distributing plans electronically with the click of a button, rather than printing multiple plans and handing them out manually.

Push notifications to staff to ensure they have the most up-to-date plans available.

Easily deploy and implement current incident management procedures and policies.

Respond immediately with accurate plans and incident management procedures during an incident.

When a crisis occurs, ensure your staff can mobilize immediately with the most current information, plans, and response procedures — wherever they are.
