

BUSINESS CONTINUITY SOFTWARE

Simplify and streamline your organization's processes for identifying critical business operations and resources, assessing and monitoring risk, and managing incidents with **Quantivate Business Continuity Software**. It's an all-in-one solution for **business continuity** and disaster recovery planning that provides built-in tools for plan creation, **business impact analysis**, scenario-based exercising, and more—guiding the development of a strategic, data-driven continuity program.

STAY INFORMED

with integrated data-sharing that helps you **understand connections and dependencies across your organization**

GET ORGANIZED

by digitizing and centralizing your BC/DR plans and other documentation

PROTECT YOUR BUSINESS

with a complete continuity program—rather than disconnected activities and data silos—**based on your actual business processes** and resources

DOCUMENT PROCEDURES

for disasters, emergencies, and other unexpected incidents to facilitate quick response and recovery
