TAKE THE GUIDED TOUR

ERM software your risk owners (and the board!) will love

Resolver's ERM software helps you promote a risk culture through collaboration. Bridge the gap between management levels and departmental silos with a tool that makes it easy to collect, escalate and report on risk data.

Resolver's ERM Application is based on the following framework:

Identify Risks

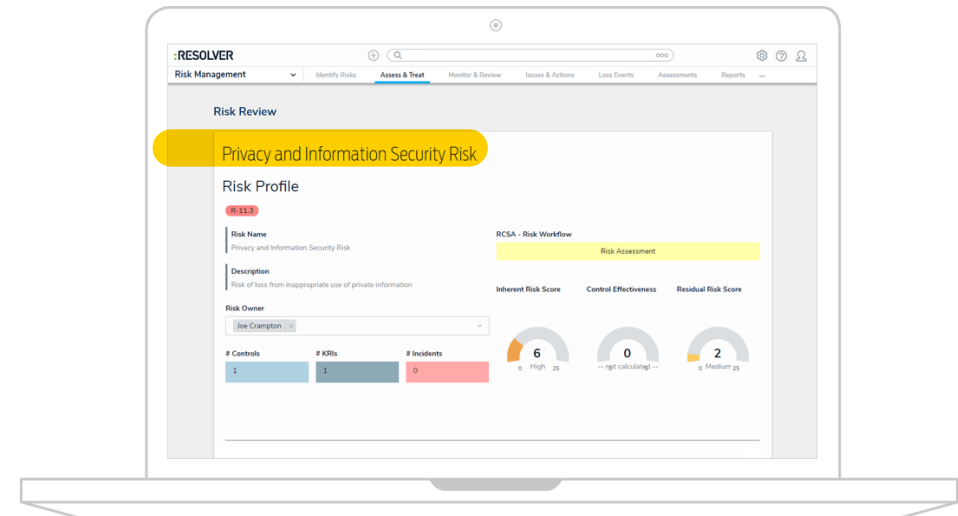

Assess and Treat

Monitor and Review

Issues and Actions

Identify Risks

Risk managers and owners can easily manage their risk environment by adding, updating and describing risks that might impact the achievement of organizational goals, including possible causes and consequences.

Why ERM Software by Resolver?

We're here to hold your hand through every step of the way. Here's how:

Getting Started

Effective risk management requires more than just software. Resolver has partnered with third-party advisors across the globe to ensure you have the processes and culture needed to successfully leverage risk management software.

Implementation

Simply transfer your pre-existing data to get started. Our Professional Services team works closely with you to support your implementation, customization, onboarding and user training, for a smooth and successful deployment.

24/7 Support

Once you go live, you'll have access to Resolver's Customer Portal and 24/7 product support. Give us a call, send an email or open a support ticket whenever you have questions or technical difficulties.

As You Grow

It's not our first rodeo. We've helped over 1000 of the world's largest organizations gain efficiencies and deliver strategic insights, and we know you have unique needs. You'll be assigned a Customer Success Manager who partners with you to ensure you get the most out of the software and connect you with a network of users and risk management professionals worldwide.

Software for all of your ERM and ORM needs

Over 1000 of the world's largest organizations use Resolver software to protect their employees, customers, data, brand, inventory, and shareholders.

Frequently Asked Questions

We're here to answer any questions you might have.

[We're worried about end-user buy-in. How difficult is the ERM software to use?](#)

Resolver's ERM software was built with the end-user in mind to remove the friction and hassle associated with submitting risk assessments and data. With an intuitive interface, configurable forms, step-by-step guides, standardized risk language and powerful automation, end users are prompted to login to the platform and follow in-app guidance to effortlessly submit the requested information.

What does the onboarding process for Resolver's ERM software look like?

What type of support will be provided after implementation of the ERM software?

Our organization is still growing. Will the ERM application be able to fit our needs as we continue to scale?

Does Resolver's ERM software come with a pre-loaded risk register?

Will we be able to configure the software to use our own risk rating scales?

How is the Enterprise Risk Management platform configurable?

What third party APIs can you integrate with the ERM application?

Do you provide templates for reporting? How customizable are the reports?

Can we customize permission settings based on who is a risk owner and who is an ERM team member?

"Resolver improved the overall efficiency of our ERM process by close to 50%. The entire Resolver team has been incredibly helpful and responsive. They do a great job of addressing our team's concerns in a timely manner."
