RiskLens Cyber Risk Quantification - Materialized Areas of Loss

RiskLens Suite of Cyber Risk Management Applications

Today, organizations can track cybersecurity threats, but struggle to quantify cybersecurity risk in financial terms that are meaningful to the rest of the business.

RiskLens is the only cyber risk quantification platform purpose-built on FAIR, the standard quantitative model for cybersecurity and technology risk.

The RiskLens platform is comprised of the following applications:

Schedule a Demo

"We reduced the number of high-risk issues by an order of magnitude by using RiskLens, which enabled management to understand and deal with the really important stuff."

IT Risk Officer, Leading Insurance Company

"We got out-of-budget-cycle funding for an expensive security improvement by using RiskLens to develop a cost/benefits analysis"

CISO, Large Bank
