Risk strategy and planning

Define risk-relevant business activities; set up your organizational risk hierarchy; assign risk appetite, risk owners, and responsibilities; and automate risk monitoring.

Risk identification

Identify relationships between risks and events, define survey questions, and document potential root causes and consequences of risks, as well as mitigation activities.

Risk analysis

Run quantitative and qualitative risk analysis to determine the likelihood of occurrence and the potential impact of identified risks.

Risk monitoring

Document incidents and losses and analyze and report on your company's risk situation.
