Information Security

VivoSecurity helps you budget and manage Infosec compliance activities in keeping with overall business priorities.

- Align Infosec program with overall enterprise risks, opportunities, and priorities
- Assess resources and investments according to projected ROI in terms of business risk reduction
- Allocate resources where business risks are highest
- Discover unexpected avenues for improved cybersecurity, based on risk profile data

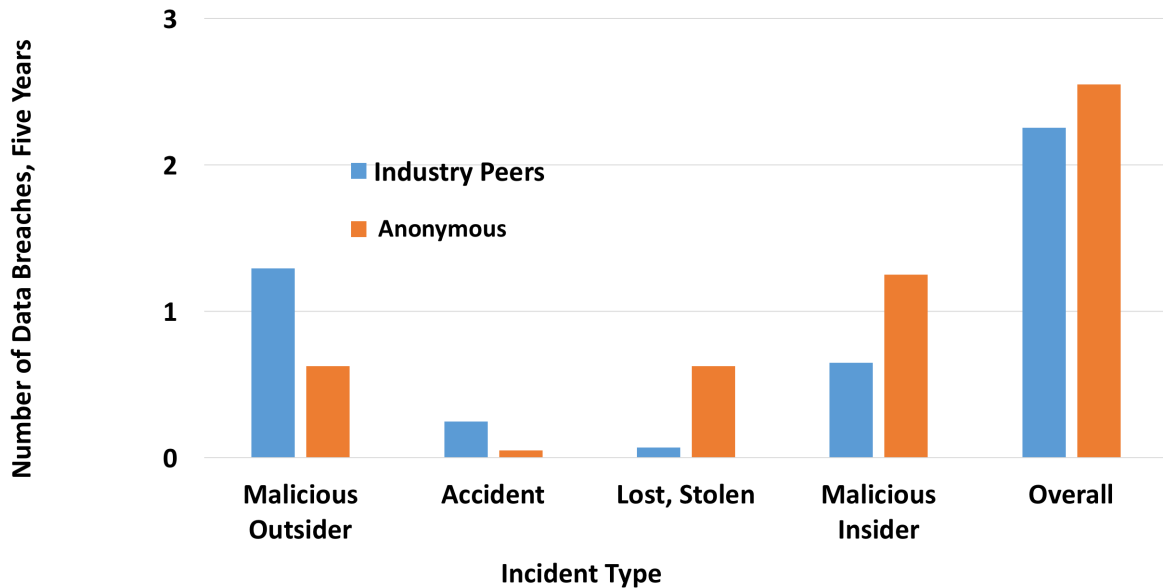

Cyber Risk Impact Analysis

- Analysis of cyber insurance coverage needs
- Assess coverage adequacy or inform coverage negotiations
- Cover cyber in corporate ERM framework

Cyber Risk Profile

- Visualize risk in dollars across your enterprise, broken down by department, type of assets at risk, type of attack or incident
- Inventory and value data and document assets, in terms of statistical value at risk
- Discover root causes and areas of vulnerability ranked by business impact

Professional Services

- “Virtual CISO” service
- Selection and adoption of risk framework (NIST, ISO 2700x, CIS CSCs)
- Roadmap, budget, and staff planning
